FAQ: Lash Extensions

What are lash extensions?

Lash extensions are semi-permanent synthetic, silk, or mink lashes that are individually applied to your natural lashes to enhance length, fullness, and curl.

How long do lash extensions last?

With proper care, lash extensions can last 2-4 weeks, depending on your natural lash growth cycle and how well you maintain them. We recommend regular infills every 2-3 weeks to keep them looking full.

Will lash extensions damage my natural lashes?

When applied correctly by a trained professional and cared for properly, lash extensions do not damage your natural lashes.

Can I wear mascara with lash extensions?

We don't recommend wearing mascara, as it can clump the extensions and weaken the adhesive bond. If necessary, use a water-based mascara only on the tips of the lashes.

Can I swim, shower, or exercise with lash extensions?

Yes - but avoid getting them wet or exposing them to steam for the first 24-48 hours while the adhesive fully cures. After that, they are water-resistant.

How do I care for my lash extensions?

- Avoid rubbing or pulling your lashes
- Clean them gently with a lash-safe cleanser
- Avoid oil-based products around the eyes
- Sleep on your back to prevent crushing them

Can I wear makeup with lash extensions?

The Nine Glow

FAQ: Lash Extensions

Yes - but avoid oil-based or waterproof makeup removers, which can break down the adhesive. Use gentle, lash-safe products instead.

Are lash extensions safe?

Yes - when applied by a trained professional using high-quality, hypoallergenic adhesives, lash extensions are safe. Always inform your technician if you have allergies or sensitivities.
